

2019-20 LEARNING SERIES PRESENTS...

EDIBLE ANIMALS

“Edible Animals” explores WHERE our food comes from *across the globe*, and also HOW & WHY we eat specific diets, and the natural WEB of animal producers, consumers and DE-composers which help each other, and us, survive. Exhibits plan to include our new Pot-bellied piglet, Patagonian Cavy, Saddled Bichir fish, Burmese Python, Green Iguana, Hedgehog as well as exotic invertebrates such as Rose-haired Tarantula, popular Leaf Insects and *other special friends!*

Booking Now for 2019-20 School Year!

Wildlife programs feature at least five live animal exhibits, subject to availability!

Bob Tarter & “Rosie” the Tarantula

“Edible Animals” is presented by Bob Tarter, Wildlife Biologist and Owner of Animalogy/NHECM. Apart from being a life long nature enthusiast, Bob has a degree in *Natural Resources and Environmental Sciences* from the University of Illinois, and spent time working as a wildlife researcher & biologist for Ducks Unlimited and IN Dept. of Natural Resources.

Iguana

In 2019 NHECM became known as “Animalogy” and continues to provide a “learning experience of a lifetime” educating tens of thousands of children & adults about the natural world every year!
